

EZVIZ DL06 Pro
Smart Dual-Sided Fingerprint Lock

**Double protection,
twice the convenience**

Unlike ordinary fingerprint locks, the DL06 Pro takes safety and convenience to a whole new level with several unique, innovative features and design. With fingerprint sensors on both handles, the lock brings further innovation to the market by allowing you to unlock two locks simultaneously by pressing your finger on only one of the two locks. It facilitates keyless entry for everyone and provides remote controls to help users better manage access and stay alerted. Ideal for homes, stores and other properties where multiple doors are in place to ensure a high level of security, the DL06 Pro features an ultra-slim, elegant design that harmonizes with various exterior designs and also fits ondoors with narrow frames.

Dual-Sided
Fingerprint Design

Synchronized Unlocking of
Two Interlinked Locks¹

Fingerprint
Unlocking

Passcode & Proximity
Card Unlocking

Remote Unlocking &
Control via the EZVIZ App

Dual-Sided
Weatherproof Design²

Smart Integration
with EZVIZ Cameras³

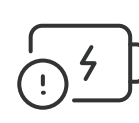

Supports Wi-Fi &
Bluetooth Connectivity

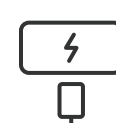

Built-In Doorbell

Anti-Tamper Alarm

Low-Battery
Warning Signal

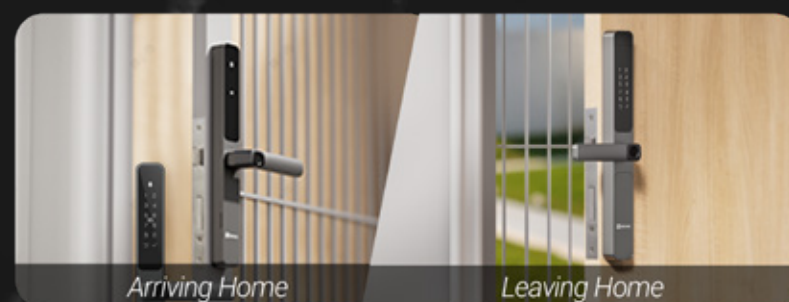

Rechargeable Battery
(Supports Type-C charging)

Double layers of security, simplified in one

Most fingerprint locks in the market only use one sensor to provide protection on the exterior of your door, leaving possibility of being taken advantage of. The DL06 Pro makes sure that every time someone tries to open the door, no matter from the outside or the inside, a verification of their unique access is required.

Always verifies before unlocking

Works safely on open, see-through security doors

Dual Fingerprint Scanners on both handles

Interior Panel

Exterior Panel

A secure, unique key at the tip of your finger

Gone are the days of forgetting your keys at home or fumbling them in your pocket. The DL06 Pro prioritizes security while enhancing convenience, so you can simply hold the handle to unlock, and enter your home in seconds.

Strict data protection with local fingerprint processing & storage

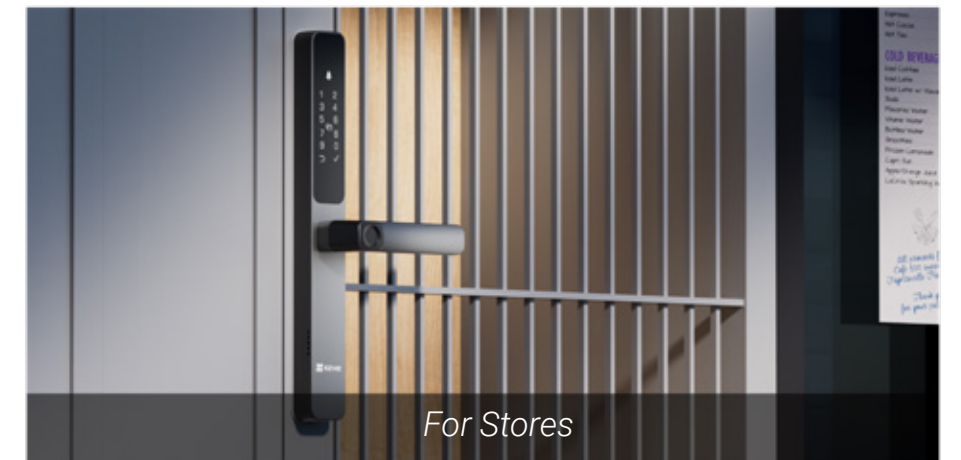

High-level security to auto-lock itself after 5 successive failed attempts in 5 minutes

High capacity to store up to 50 sets of fingerprints

Seamlessly unlock two doors together, fast and easy

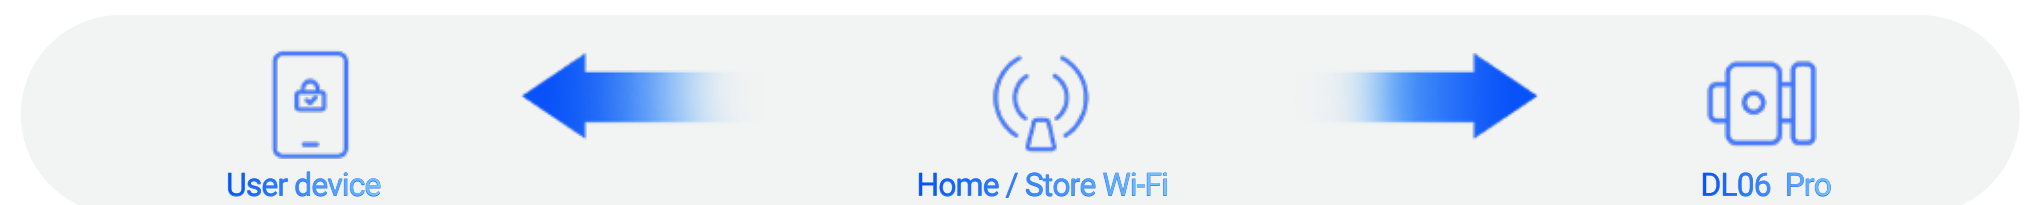

It's never too much to add for the sake of better protection to your home or business, but you don't want the trouble of opening door after door. The DL06 Pro is one of the first on the market to tackle this problem. It allows you to effortlessly open and close two doors together, as long as one of them verifies your identity.¹

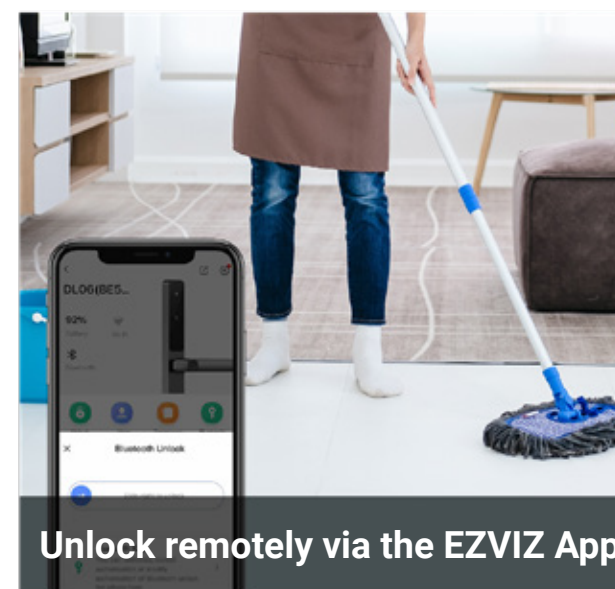

Unlock and control access, even remotely

Get the message notifications via the EZVIZ App, whenever and wherever. You receive push notifications when your door is opened or when the lock's battery is low. You will also be alerted when there are suspicious activities of removing your lock or forced entry.

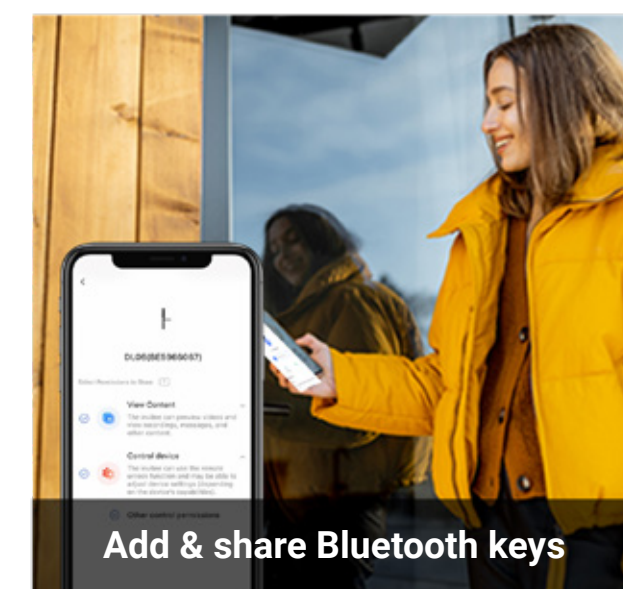

Directly Connects to Wi-Fi

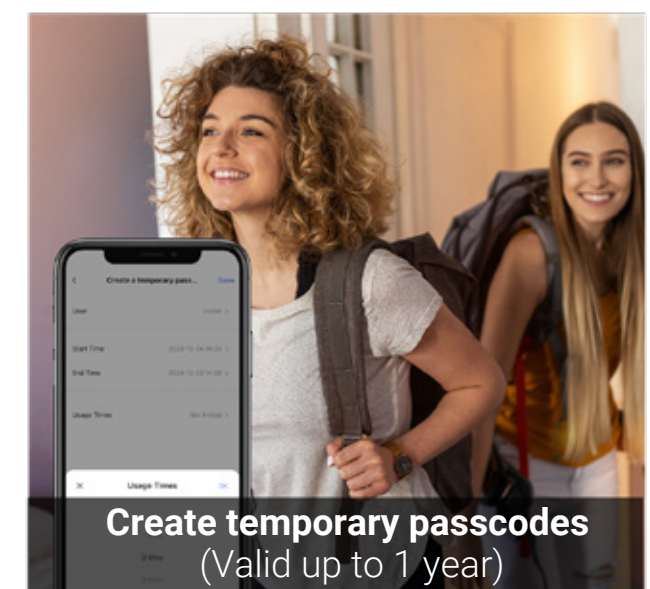

Service people

Family & friends

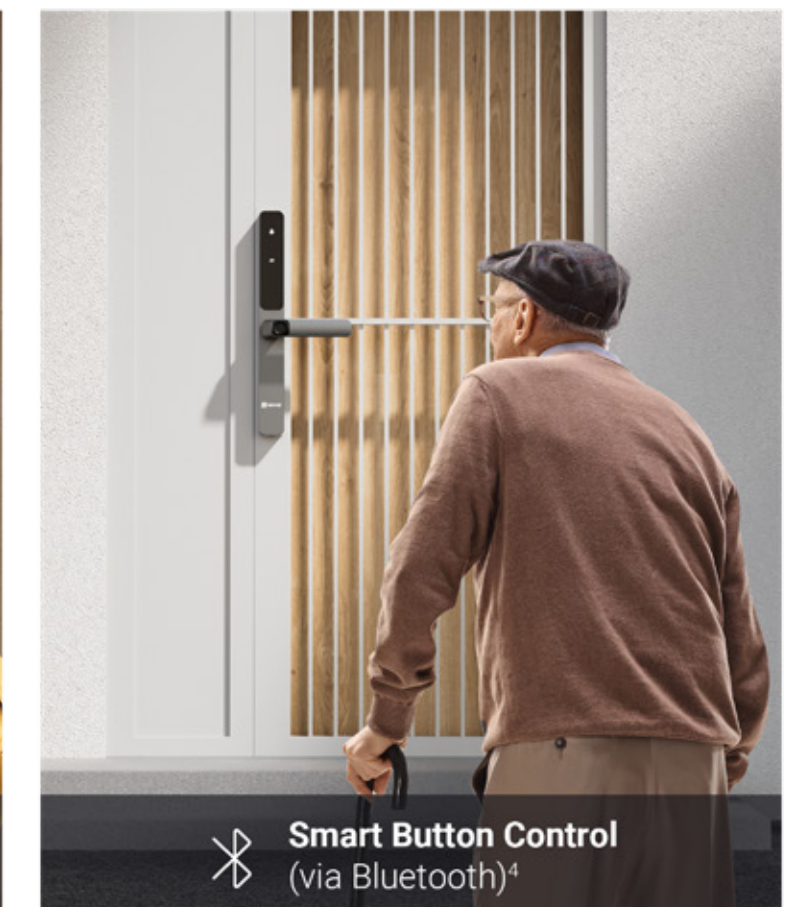

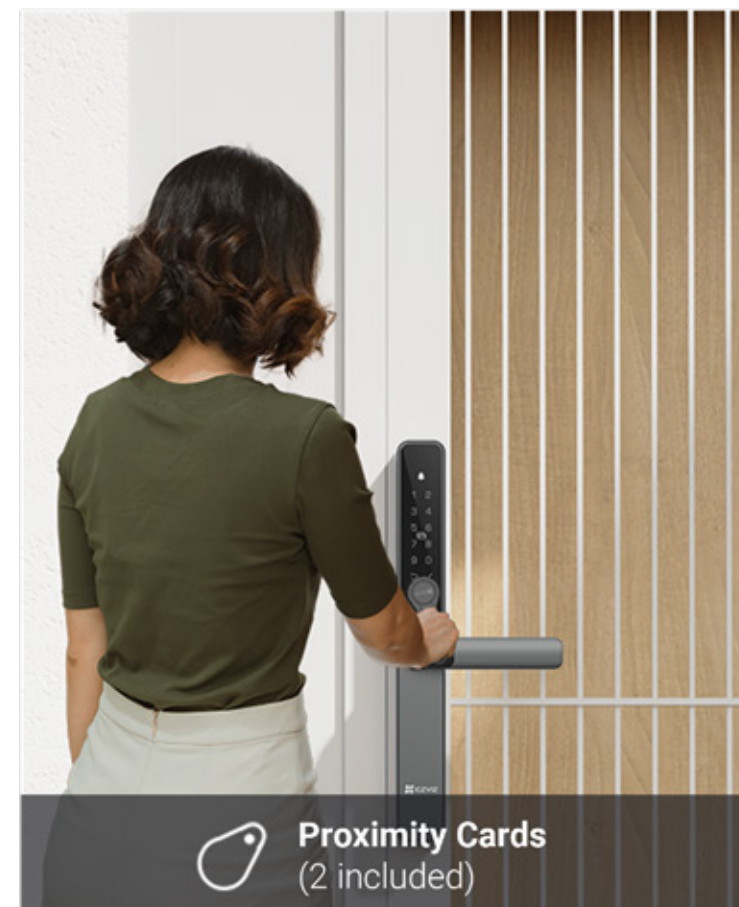

Long- & short-term tenants

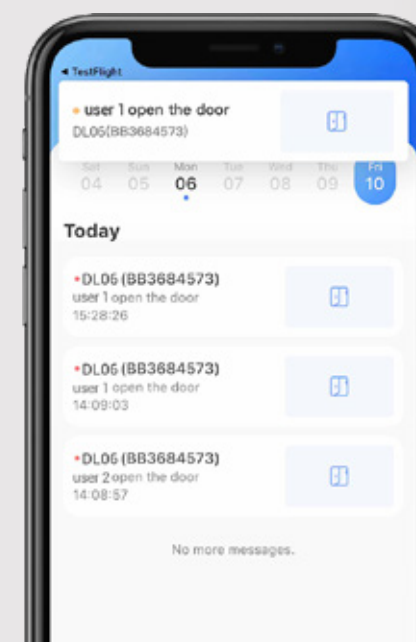

More ways to unlock, flexible for everyone

Even for people who see their fingerprints worn off and those who don't have a smartphone, the DL06 Pro serves them well, too. You can even create a simple door switch by adding a compatible smart button to control the opening on the site.

Stay notified, feel securer

Get the message notifications via the EZVIZ App, whenever and wherever. You receive push notifications when your door is opened or when the lock's battery is low. You will also be alerted when there are suspicious activities of removing your lock or forced entry.

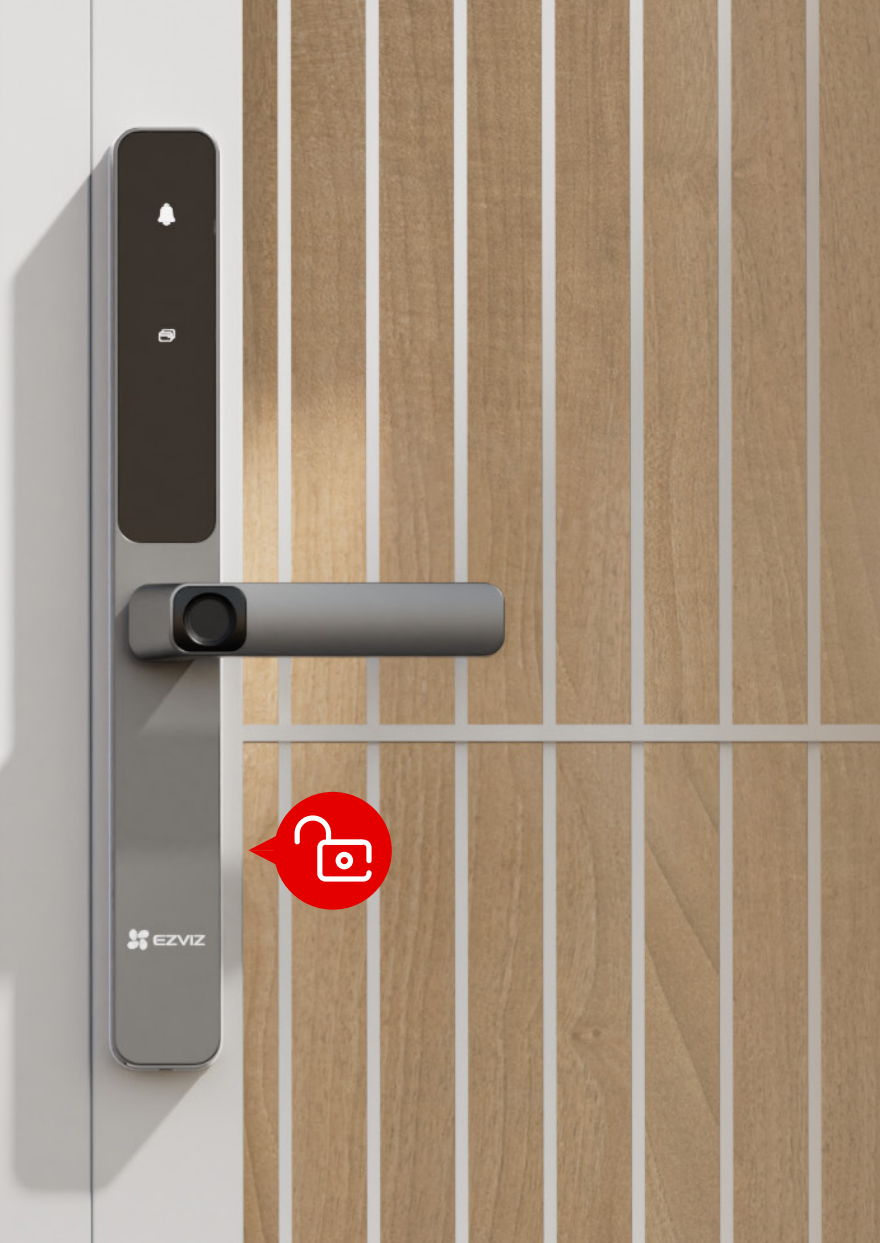

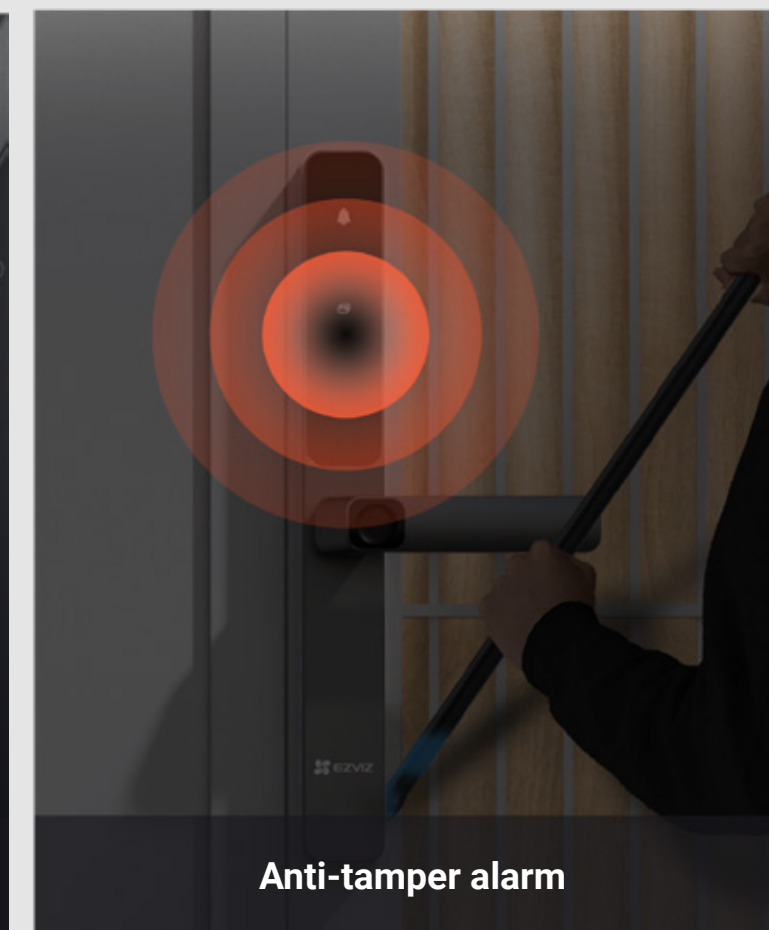

Enhance whole-home security, starting with your front door

Explore DL06 Pro's smart potentials by connecting it to a collection of EZVIZ smart home products. With the help of an interlinked EZVIZ indoor PT camera³, you know not only when the door gets opened, but also who enters with an auto-recorded video.

Sturdier than you might expect

Reliable power for a busy household

The DL06 Pro works on a rechargeable battery that can run relatively long on a full charge. You don't need to spend money on single-use batteries. Simply grab a power bank and let it reboot your lock.

- 1 The DL06 Pro currently only supports synchronized unlocking with another DL06 Pro or a DL05 fingerprint lock. To utilize the synchronized unlocking function, please ensure that the two compatible locks and your EZVIZ App are updated to the latest versions to fully support the operation of this specific function. The list may grow as EZVIZ launches more compatible products in the future.
- 2 Both the exterior and inside lock panels of the DL06 Pro are rated IP65 to work in outdoor weather conditions, based on EZVIZ Lab's test results.
- 3 The DL06 Pro currently supports the following cameras to snap a photo or record a video at a certain preset viewing angle upon sensor detection: H6c, C6N, CP1, TY1, TY2. The list may grow as EZVIZ launches more compatible products in the future. Please refer to the device page on your EZVIZ App for detailed information about the supported integration.
- 4 The DL06 Pro currently supports the T3C Smart Button for on-site Bluetooth unlocking within a communication range of 50 m, based on the test results in an open and interference-free environment. Actual use may vary due to the specific environment. To use this function, the user should first connect the DL06 Pro to the Wi-Fi network to enable the EZVIZ App settings, and follow the pairing instruction on the device page to connect it with the T3C smart button via Bluetooth.

Specifications

CS-DL06-R101-WBCP-GR(M)

Material and Specification

Panel Material	Aluminum alloy
Panel Size	331 × 40 × 25.8 mm
Color	Metallic grey
Lock Body Type	Lift-up lock body
Lock Cylinder	2885 / 3585
Weatherproof	IP65 (front & rear Panel)
Emergency Charging	Type-C
Working Power	1,450 mAh Rechargeable Lithium Battery

Real Time Notification	Supports
Anti-Test Locking	Supports, enter error 5 times within 5 min, locking 3 min.
Anti-Tamper Alarm	Supports
Remote Control	Supports
Supported Door Thickness	30-110 mm
Working Temperature	-25°C~70°C
Operating Humidity	10%~95%

Technical Specification

Unlocking Method	Fingerprint, passcode, proximity card, mechanical key, Bluetooth remote control , Bluetooth key via EZVIZ App, temporary codes, remote unlock
User Capacity	50 pcs
Fingerprint Capacity	50 pcs
Passcode Capacity	50 pcs
Card Capacity	50 pcs
Communication Methods	2.4GHz Wi-Fi, Bluetooth
Temporary Access Codes	Supports
Anti-Peeping Codes	Supports, Max. 20 digits
Low Battery Warning	Supports
Privacy Mode	Supports
User Management	Supports

In the box
